## THREE CARD POKER

Three card poker is a form of stud poker. Three card poker offers two independent betting options. One bet is called the pair plus bet. This wagering option allows the player to bet solely on the value of his or her hand. Additionally, a second betting option is available to the player called the ante bet. This option allows the player to wager that his or her hand will beat the dealer's hand. After seeing their cards, the players who have placed the ante wagers may either forfeit their wager and cards or wager an amount that is equal to the ante wager called the play bet to stay in the game. Once the dealer's hand is exposed and the best possible three card poker hand is determined, all winning bets are paid according to the payout schedules for each wager. Losing bets are forfeited.

### BET AGAINST THE DEALER'S HAND

The ante allows you to play against the dealer. After you look at the three cards, you have two options. You can either fold, or if you think your hand is high enough to beat the dealer, place an equal wager on the play spot. If your hand beats the dealer's qualifying hand of a queen or better, you win both wagers. If the dealer does not qualify, you win the ante wager and the play wager is a push.

### BET ON YOUR OWN HAND

Bet just the pair plus spot to play your hand value only and not against the dealer's hand. If your hand contains a pair or better, you win!

### BET BOTH

Bet both by placing wagers on ante and pair plus. If you make both wagers, but do not make a play wager, you will forfeit the ante and pair plus.

# PAYOUTS
